

## INTRODUCTION

EnvisionRx utilizes a Pharmacy and Therapeutics Committee (P & T Committee), made up of practicing physicians and pharmacists to help ensure that our formulary is medically sound and that it supports patient health. This committee reviews and evaluates medications on the formulary based on safety and efficacy to help maintain clinical integrity in all therapeutic categories.

## FORMULARY DESIGN

There are numerous formulary designs that can be used by a pharmacy benefits administrator. EnvisionRx has chosen a formulary structure which is open and incentive based.

- *Open Formulary*: features co-payments for medications that are preferred and non-preferred brands, plus lower co-payments for generic drugs.
- *Incentive Based*: features different co-payments for medications that are preferred or non preferred. In this type of formulary, the patient cost structure may be two-tier, three-tier, or four-tier design.

## USING THIS FORMULARY REFERENCE GUIDE TO HELP CONTAIN COSTS

Many benefit sponsors use the EnvisionRx formulary to help manage the overall cost of providing prescription drug benefits. This formulary offers a wide range of medications from which to choose. **We realize that this formulary reference guide may not include every drug from every manufacturer. However, choosing a preferred drug (Tier 2 or generic) when it is appropriate can provide access to the necessary medications to stay healthy, at a cost that is more affordable.**

### Mandatory Generic

The Prescription Drug benefit is a “Mandatory Generic” program. Each Prescription will be filled as a Generic when available. If the Physician or the Covered Person requests a Brand Name Medication when there is an FDA “AB” rated Generic available, the Covered Person will be charged the applicable Deductible/ Co-insurance/ Co-payments plus the difference in the price of the Brand Name Medication and the available Generic. This charge is referred to as a DAW (Dispense as Written). The fee is applicable regardless of prescriber request or member request.

### Brand Drugs with a Generic Equivalent

Brand drugs which have a generic equivalent will be classified as non-preferred brand products, with the generic versions of those drugs available on the generic tier. Most covered individuals need not do anything as a result of this change as the dispensing pharmacy will typically substitute the generic equivalent, unless prohibited by the prescribing physician. Beginning January 1, 2016, brand drugs will immediately be reclassified as non-preferred once the generic equivalent becomes commercially available. Exceptions may occur on the formulary should the cost of the brand drug be less expensive than the generic equivalent.

## **CONSIDERING PREFERRED ALTERNATIVES**

EnvisionRx realizes that the medications on the formulary may not always be appropriate for all patients. However, by referring to this formulary reference guide, one can help ensure the full advantage of the coverage provided by the prescription drug plan.

Pharmacies cannot substitute a preferred brand-name drug without the prescriber's approval. Therefore, a pharmacist may contact the prescriber to obtain authorization to dispense an alternative preferred product when a non-preferred product is prescribed.

## **SAVING ON OUT-OF-POCKET COSTS**

The prescription drug plan determines the cost for generic, preferred brand-name, and non-preferred brand-name medications. Benefit providers often design prescription drug plans to encourage the use of generic and preferred brand-name drugs. Choosing non-preferred drugs may mean paying higher out-of-pocket expenses (such as coinsurance, co-payments, and deductible amounts) or not receiving coverage at all. Patients may also pay less for generic drugs, or they may be asked to pay the cost difference between brand-name drugs and their generic alternatives, which are preferred by the plan.

## **CONSULTING THE PRESCRIBER'S OFFICE WHEN APPROPRIATE**

When employers and other benefit sponsors design their prescription drug plans, they may choose to provide coverage only for certain medications or for particular uses, time periods, doses, or quantities (e.g. they may exclude coverage for medications for unapproved, unproven, or cosmetic indications, as well as over-the-counter medications). When coverage for medications is provided based on use or quantity, EnvisionRx may contact your prescriber's office for additional information to determine whether coverage is available under your plan.

**PLEASE NOTE:** Preferred brand drugs may move to non-preferred status if a generic version becomes available during the year. Not all drugs listed are covered by all prescription-drug benefit programs. For specific questions about your coverage, please call the phone number printed on your member ID card or visit [envisionrx.com](http://envisionrx.com)

This formulary's indicated drug coverage, Tier placement (1-5), Step Therapy (ST), Quantity Limit (QL), and/or Prior Authorization (PA) is subject to change at any time after it is made available for member reference. This is a result of pharmaceutical manufacturer and industry changes that occur on a daily basis.
